

MILLENNIA & PREFERENCE ELECTRIC & DUAL-FUEL RANGE COOKING GUIDE

dacor
Family-Owned. American-Made.

Delicious. Sizzling. Professional chef-style results. Right from your Dacor range!

Your new range offers one of the best convection cooking systems available – Dacor's Exclusive 4-Part Pure Convection™ System. You now have the power to use any rack position and use the full space of the oven, while achieving even baking and roasting. Dacor's electric broiler will give you beautifully seared and caramelized foods while preserving moisture inside.

As you begin cooking in your new oven, you will find that Pure Convection™ makes it easier and more efficient to attain wonderful results. Meats will get a beautiful brown exterior while staying succulently moist. Cookies and baked goods will rise and brown nicely, even if more than one rack is used at a time.

This guide has been prepared to help you maximize the use of your new Dacor range. Included are useful tips, easy-to-read charts, advice on choosing the best cooking mode, and over 30 of my favorite recipes. Also included are a few tried-and-true Dacor family recipes from our founder and first chef, Stan Joseph. Creating, testing, and preparing this guide has been a personal and professional pleasure. I know you'll be pleased with the results!

Enjoy cooking on your new range and Bon Appetit!

For more recipes, please visit our website at www.dacor.com under Chef's Corner.

**TO SET THE CLOCK:**

- Press CLOCK on control panel.
- Press Up/Down arrows to reach correct time.

(Note: "A.M." and "P.M." will show while you are setting the clock but not when the time is displayed on the control panel.)

TO BAKE, PURE CONVECTION™ OR CONVECTION BAKE:

- Press desired cooking mode.
- Press Up arrow to set temperature (oven automatically defaults to 350°F).
- Oven begins counting from 135°F.
- When oven is finished preheating, it will beep and you may put food in the oven.

TO INCREASE/DECREASE OVEN TEMPERATURES:

- Press selected cooking mode
- Press Up or Down arrows to reach desired new temperature

TO BROIL OR CONVECTION BROIL:

- Press BROIL mode.
- Press Up arrow to set temperature ("HI" equals 555°F).
- The electric broiler works best if you allow it to preheat about 10 minutes.

TO SET TIMERS:

- Press TIMER 1 or TIMER 2
- Hold Up arrow to set desired time. It will count in seconds first, then scroll faster with more time.
- Release UP arrow, then oven will begin to count down.
- When time is up, the oven will beep.
- To stop the beeping without shutting off the oven, press TIMER 1 or TIMER 2 once.

TO ADD MORE TIME ONTO THE TIMERS, OR CANCEL THE TIMER BEFORE THE TIME IS UP:

- Press appropriate TIMER 1 or TIMER 2 button.
- To add more time, press the Up arrow to desired new time.
- To cancel timer, press the appropriate timer button twice. ":00" will flash

TO TURN THE OVEN OFF:

- Press CANCEL/SECURE. (Note: This will not turn off the oven lights or the timers.)

TO LOCK THE CONTROL PANEL:

- Press and hold CANCEL/SECURE for 6 seconds. You will hear one beep when activated and OFF will read on the control panel.
- This feature is best used when cleaning the control panel, or preventing the oven from accidentally turning on.

TO UNLOCK THE CONTROL PANEL:

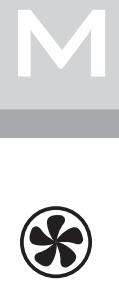

- Press and hold CANCEL/SECURE for 6 seconds. You will hear one beep and OFF will disappear from the control panel.

TO SET TIMED-DELAY COOKING:

- Make sure that the correct time of day is set (A.M. or P.M.).
- Adjust rack positions and set food into oven.
- Press cooking mode.
- Press Up or Down arrows to set temperature.
- Press COOK TIME. This refers to the duration of the cooking cycle not the start time.
- Press STOP TIME. This is when you want the food to be DONE. (Important: You must press STOP TIME for the oven to automatically calculate the START TIME.)
- The convection fan and the cooling fan will go on after programming this feature, even if the oven does not start right away

TO SELF-CLEAN OVEN:

- Remove all oven racks and filter from the oven.
- Press SELF-CLEAN.
- Press Up arrow to set desired amount of time, from 2-4 hours.
- Door will lock. After it unlatches and cools, wipe up ash with hot, soapy water.

SELECTING A BAKING MODE

PURE CONVECTION™

This mode uses a third element, located behind the baffle in the back of the oven chamber, and does not draw direct heat from the bottom nor top elements. Air is circulated by the convection fan. Pure Convection™ provides the most even heat from rack-to-rack and is recommended for any single-rack baking in a shallow pan, multirack baking, roasting, and complete meals. It is especially great for baked goods that are mostly exposed to the convection air in a shallow baking pan. Soufflés, cakes, cookies, pastries and free-form yeast breads (such as French bread) are a few examples. The more the food itself is exposed to the convection air, the better this mode will work. When using Pure Convection™ for roasting, raise the food up on a V-shaped rack that sits inside a roasting pan. This will allow air to circulate around the roast, lock in juices, and give it a beautiful golden sear, while shortening the cooking time in most cases.

CONVECTION BAKE

This mode uses the bottom bake element and the fan in the back to circulate air. There is a small amount of heat from the top and no heat from the third element. This mode is best for large roasts, turkeys over 25 pounds, earthenware-baked items, baking-stone items, and dense foods that need bottom heat in order to cook correctly. Lasagnas, pizzas, pies and loaf breads come out great using Convection Bake.

BAKE

This mode uses bottom heat only. A small amount of heat comes from the upper element and no heat from the third element. This mode is best for foods baked in a water bath, such as creme brulee, cheesecake or flan, or items that are completely covered. In Bake mode, use rack positions 1 or 2 to get the food as close to the heat source as possible. This will help the food bake closer to the stated times.

STANDARD BROIL

This mode uses the heating element located in the top of the oven cavity only. No preheating is necessary when broiling. Foods should be placed 4-6 inches from the surface of the broiler for best results. Center the broiler pan lengthwise, then push it all the way to the back wall to get the correct broiling position. Smaller cuts of meat, cut vegetables, breads, and some desserts are best for broiling.

CONVECTION BROIL (RSE MODEL ONLY)

This mode uses the element located in the top of the oven chamber only, using the convection fan to circulate heat. The electric element needs preheating for about 10 minutes in order to cook foods correctly. Center the broiler pan under the broiler for best results. This mode is best for fish that would normally flake apart when flipped or for thin-cut vegetables. Garlic bread works well also, as the butter seeps into the bread while it browns on top. Larger cuts of meat and poultry are best on Standard Broil.

Why Use Pure Convection™?

Pure Convection™ uses a third heating element that surrounds the convection fan in the back of the oven. The oven's baffle and filter separates the food from the heat source. The filter purifies the heated air as it is pulled in through the fan and across the element. This eliminates any transference of flavors from one food to the next. The baffle redirects the heated air to eliminate hot or cold spots in the oven.

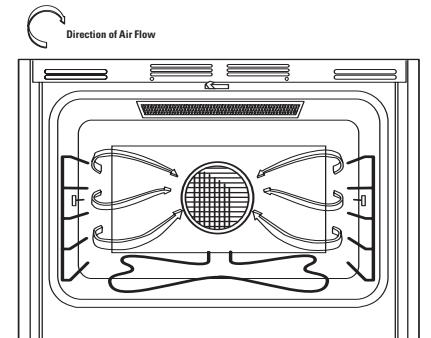

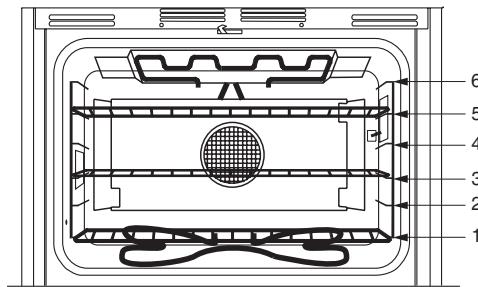

Diagram of Conv Bake airflow

Rack Positions

Here are a few benefits of cooking with convection:

1. Each rack position will heat more evenly, allowing you to cook successfully on more than one rack at a time.
2. The filter across the convection fan keeps the oven running cleaner by trapping grease.
3. Roasting on Pure Convection™ provides quick browning to lock in the juices and keep meats moist and flavorful.
4. No basting is necessary when roasting on Pure Convection™.
5. Convection uses a lower temperature and, in most cases, foods cook in less time than in a conventional oven.
6. Pie shells shrink less when blind-baked in convection.
7. Baked goods such as breads, cookies and cakes will rise beautifully and bake to a golden brown.
8. Cream puffs steam to a light, airy form while cooking to an even golden brown.

1. In all ovens, rack positions count up from the bottom, rack 1 is the bottom; rack 6 is the top.
2. Oven temperatures range from 135°F – 555°F, and can be set in 5-degree increments.
3. Except for Standard Broiling, always allow the oven to preheat fully before adding food. For delicate baked items, allow a longer preheat to help stabilize the oven temperatures.
4. If using a recipe that requires a “cold oven start,” use the Timed-Delay Feature. See recipe in “How to Program Timed-Delay Baking” for specific instructions.
5. When converting original single-rack recipes to convection baking, reduce the oven temperature by 25 degrees because hot air will be circulating around the food in addition to the normal radiant heat. Foods will brown a lot faster than in Convection mode, therefore the temperature needs to be reduced.
6. In most cases, single-rack baking in Convection mode will take less time. The larger and denser the food, the greater the time-savings.
7. When foods are placed on multiple racks to bake, the “cold mass” will initially lower the oven temperature and the oven will need to heat up to the desired level. Keep in mind that there is a slight increase in baking times for multirack cooking.
8. The rack positions, temperatures and times in the baking, roasting and broiling charts are recommendations only. Each recipe involves many variables, from ingredients to technique, and the actual times and temperatures may vary because of this.
9. To prevent heat from escaping, develop a habit of looking through the oven door window instead of opening the door to check cooking progress. In more delicate foods or in multiracked food cooking, this can make a huge difference in baking evenness. Lost heat from the open door causes the element to come on to compensate, and the recovery time to get back to the desired temperature can affect the cooking time and outcome of the dish.
10. Be familiar with your oven timers. They will help you keep an eye on your foods.
11. For best results, measure ingredients carefully and follow tested recipes. This is especially important in baked goods, which can be more temperamental than other foods.
12. To rise yeast breads in the oven: Turn on the oven’s halogen light and place the dough in a covered greased bowl. The lights will emit just enough heat to proof yeast breads. You can also turn the oven onto Standard Bake at 135°F. Then just before placing the dough in the oven, turn off the heat and turn on the halogen lights. The insulation around the oven chamber will retain heat and provide a draft-free environment to rise yeast breads.

RECOMMENDED BAKEWARE

- If purchasing bakeware, there are two special pans required for convection cooking: 1) low-rimmed, light colored aluminum cookie sheets and 2) a roasting pan with a V-shaped rack that fits inside. Almost any bakeware will work in this oven, if it is covered dish or a thicker, denser pan, use the Convection Bake or Standard Bake mode.
- Follow the recipe’s recommendation for pan size and type.
- Shiny, reflective pans are best for cakes, quick breads, muffins, cookies, and pies. This will prevent the crust from browning too fast, as a darker finish may cause it to do so.
- Medium-gauge aluminum sheets with low sides are best in the Convection modes because air is able to circulate fully around the food.
- Bake most frozen foods in their original foil containers, and place on a cookie sheet. Follow the package recommendations for baking.
- When using glass bakeware, lower the temperature by 25 degrees – a recommendation made by most glass cookware manufacturers. When using glass bakeware in the Convection Mode, only lower the temperature 25 degrees.

PAN PLACEMENT TIPS

- Place the long side of cookie sheets and pans horizontally on oven rack for even heat coverage.
- When using Standard Bake or Convection Bake mode, leave 2 inches of space around all sides of the pan to allow the heat to rise.
- When using the Convection modes, remember to keep the pans forward and away from the convection filter to ensure proper airflow throughout the oven chamber.
- Aluminum foil may be used on the oven racks to catch overspill and also to cover foods during the baking process in any mode. DO NOT, however, line the bottom of the oven with aluminum foil. During self-cleaning, remove any foil along with the oven racks.

MULTIRACK BAKING TIPS

1. Always use Pure Convection™, unless noted differently in the charts below.
2. Center the pans on the rack for best baking results.
3. Allow oven to preheat an additional 20-30 minutes after the preheat tone when multirack-baking delicate items such as cookies and cakes. This will help the temperature to stabilize and reduce heat loss when opening the oven door.
4. Load the oven as quickly as is safely possible to prevent heat loss. Turn oven lights on and check cooking progress through the window.
5. Multirack cooking does not require that all foods have the same cooking time. Foods can be removed from the oven, one at a time as they are done.
6. When baking on two racks, use positions 2 and 4, 1 and 3, or 1 and 4. Use rack positions 1,3, and 5 when baking on three racks.
7. When going from single-rack to multiple-rack baking, add time to the baking process because the additional cold mass in the oven causes longer temperature recovery time.
8. Always follow the "Bakeware Selection Tips" in your oven's Use and Care manual.

CONVECTION OVEN ROASTING TIPS

1. Convert conventional Standard Bake recipes to Convection recipes by reducing the temperature 25 degrees and the cooking time by 10-15%.
2. Always roast meats fat-side up using a V-shaped-rack roasting pan that fits the size of the food being prepared (use the bottom broiler pan that came with your Dacor oven and place a V-shaped rack inside). No basting is required when the fat-side is up. Do not add water to the drip pan because it will cause a steam effect. Roasting is a dry-heat process.
3. Place poultry breast-side up on a rack with a drip pan. (You can use the broiler pan that came with your Dacor oven.) Brush poultry with melted butter or vegetable oil before roasting to help seal in juices and enhance browning.
4. Tall-sided pans are not recommended when roasting in Convection modes because they prevent the heated air from circulating around the food. A pan with a 2"-3" rim is fine if the roast is raised up on a V-shaped rack. It will catch juices and still allow air circulation.
5. When using a meat thermometer, insert the stem part halfway into the center of the roast's thickest portion. For poultry, insert stem into the inner thigh, between the body and leg. Avoid touching bone, fat or gristle with the probe's tip; it will give you inaccurate readings. After taking an initial temperature reading, insert the probe a $\frac{1}{2}$ " further. Take another reading. If the temperature registers below the first reading, continue cooking until desired temperature is reached.
6. It is okay to remove meats from the oven when the temperature reads 5-10° F below the desired temperature because the meat will continue to cook for a short time. This is called "carryover" cooking and can be utilized for 10-15 minutes in order to make carving easier and to help meats retain their juices.
7. Do not foil tent or cover roasted meats in the Pure Convection™ mode because it will block the convection air from reaching the food and aiding in the roasting and searing process. If this is your preferred method of roasting, however, use Standard Bake rather than Pure Convection™ or Convection Bake.
8. Roasting times always vary according to the size, shape and quality of meats and poultry. Less tender cuts of meat are best prepared in Standard Bake and may require moist cooking techniques. Please follow your favorite cookbook's recipes for these types of dishes.
9. Lining your roasting pan with foil makes for easy clean up.

Here are a few turkey tips that may come in handy during the holidays. As a good rule of thumb, plan on serving 1 pound of turkey per person. This will allow some extras for the big eaters and leftovers for fabulous turkey sandwiches after the holidays.

WHAT'S THE LARGEST-SIZED BIRD THAT WILL FIT IN MY OVEN?

OVEN CELL SIZE	TURKEY SIZE- IN POUNDS
30" oven chamber	30

MEAL PLANNING POINTERS

- Allow between 1 to 5 days for turkeys to defrost, depending on the size.
- Typically 1 pound of turkey per person should be plenty.
- Calculate the time needed for each side dish and the turkey to insure proper preparation, cook time, rest time and carve time for each item. From there, determine which item needs to be cooked first and which can be prepared early and kept warm till serving.
- Your Dacor oven has two timers that are extremely handy for large meals. Set them to remind you when to place the 2nd and 3rd dishes in the oven or on the cooktop.

PROPER THAWING OF YOUR TURKEY

Frozen turkeys may prevent bacteria from growing, but it does not kill them. Therefore, it is important to keep turkeys out of the **Temperature Danger Zone- 40°F – 140°F**. Never defrost a turkey by placing it on the counter. It can cause foodborne illness.

THERE ARE TWO WAYS TO SAFELY DEFROST A TURKEY:

1. **Under refrigeration.** This requires adequate refrigerator space and advanced planning and is the preferred method for defrosting a turkey. The turkey should be placed on the lowest possible shelf to prevent any juices from spilling into other foods. A high-rimmed pan (2"-3") is required to catch any juices. Defrost time will depend on the size of the bird. On average, it will take a day or two for the bird to be completely defrosted. Plan on defrosting and cooking within a two-day time period.
2. **Using a Large Sink and Running Water.** The turkey may be defrosted by placing it in a sink full of running water or in a sink of water that will be changed every half hour. Ample room is needed for loose particles and overflow. Special care must be taken in cleaning and sanitizing every tool used in preparation of the turkey. Hot water and a bleach-based cleanser should be used to sanitize the sink and utensils used.

* **Using Pure Convection™.** You may use Pure Convection™ at 150°F to defrost a partially frozen turkey for same-day cooking. Place turkey on an oven cooking rack, allowing approximately 8-11 minutes per pound to defrost the turkey. This is not recommended with frozen solid turkeys as it will remain in the Temperature Danger Zone for too long.

ROASTING UNSTUFFED TURKEYS

1. Place turkey on a roasting rack above a roasting pan. Use a roasting pan that allows for at least 3/4 of the turkey to be exposed above the sides of the pan. This allows the convection air to flow freely around the bird, giving it a nice, brown sear. It also helps to lock in the juices inside of the turkey, creating a moist, tasty product.
2. Pre-heat the oven to 325°F- 350°F. For turkeys weighing between 8-25 pounds, use the Pure Convection™ mode. If over 25 pounds, use the Convection Bake mode. Larger turkeys need that bottom heat from Convection Bake in order to cook properly.
3. The best rack position for the turkey is either position 1 or 2. When roasting one turkey, place the turkey with the rack facing sideways. For two turkeys in one oven cell, two 10" x 13" pans with racks will fit front to back in a 30" oven chamber.
4. Cooking time will be approximately 10-12 minutes to the pound for an unstuffed bird. Begin checking the internal temperatures with an instant-read thermometer about 20 minutes before the expected time of completion. Internal temperatures should read 165°F in the breast, 170°F in the thigh.

ROASTING STUFFED TURKEYS

1. Follow the same baking instructions as above.
2. A stuffed turkey under 20 pounds should be roasted on Pure Convection™. Any bird over 20 pounds and stuffed should be roasted on Convection Bake, and baking times will increase to 14-15 minutes per pound.
3. Using an instant-read thermometer, always take internal temperatures of both the turkey and the stuffing to insure safe serving. Refer to the chart below for temperature information.

PRODUCT	INTERNAL TEMPERATURE	MINUTES PER POUND
Turkey-Unstuffed	180 in the thigh	10-11
Turkey-Stuffed	180 in the thigh	14-15
Stuffing	165	10-11

OTHER HELPFUL ROASTING HINTS

1. Spray roasting rack and roasting pan with nonstick cooking spray. This will make cleaning up easier.
2. Rinse and pat dry the turkey with paper towels.
3. An olive oil rub helps seal in the juices and aids in browning the turkey.
Please refer to the recipes below for ideas.
4. It is best to use fresh herbs in the olive oil rub, since dried herbs may brown too quickly.
5. For added flavor, slit the skin at the bottom of the breast to create a “pocket” between the skin and the breast. Insert the olive oil rub underneath the skin.
6. Chopped onions, carrots, celery and whole herbs may be inserted into the cavity of the bird. This helps retain moisture while adding flavor to the turkey. These vegetables can be used to flavor homemade gravy after the turkey has reached its safe internal temperature.
7. Never discard turkey drippings. It adds flavor to stuffing, makes a great stock for soups and stews, and makes the best gravies and sauces to serve along with your turkey. If you must discard it, let it cool and scrape into the trash. Do not throw it down the sink, as it may clog drains.
8. If there are not enough drippings in the bottom of the pan to make your favorite gravy, keep in mind that they are still inside the turkey. You may need to compensate with additional stock or broth.
9. No basting is necessary when using the Pure Convection™ mode. If you are using a special sauce or marinade, however, you may want to baste it a couple of times during the cooking process. Do this during the last hour of cooking.
10. It is better to prepare stuffing on the side, instead of stuffing the turkey. Stuffing lengthens the cooking process by adding “insulation,” making it slower to reach a safe internal temperature of 165°F. The turkey may get done earlier and dry out before the stuffing is cooked through. Since minimum internal temperatures cannot always be reached, we recommend cooking a separate casserole dish of stuffing.
11. It is acceptable to cover wings and legs that seem to be browning too quickly with foil. Keep in mind that Convection will brown a turkey quickly, which will help it to remain moist inside.
12. If you are completely covering a turkey in a roasting pan or using an oven-roasting bag, Convection is not necessary. Standard Bake is the best mode for this type of roasting, simply because the convection air is not able to reach the turkey.
13. Instead of doing one really large bird, try roasting two medium-sized birds at once. In Dacor’s oven, you can place two 15-pound turkeys side-by-side on roasting racks. Think of it: four breasts, four legs! That’s enough for 30 people! Another reason to try this is because the smaller the bird, the more tender it will be. And the time will remain the same for one bird- 8-11 minutes per pound! Your two birds at 15 pounds each will cook in about 2 hours!
14. Timed-Delay Cooking. We do not recommend using the timed-delay function on your oven to cook your turkey. It is hard to keep protein foods out of the Temperature Danger Zone of 40°F – 140°F. In using timed delay, you are allowing a raw turkey to sit in the oven for an extended period of time, which allows bacteria to grow and a possible foodborne illness to occur.
15. Most Important Tip of All. Be sure to clean and sanitize every utensil used in preparation of the turkey. This includes cutting boards, knives, kitchen sinks and, most importantly, your hands. Hot water and a bleach-based cleanser should be used on utensils, and as-hot-as-you-can-stand-it water and antibacterial soap should be used on your hands.

Broiling is a quick and flavorful way to prepare many foods. In broiling, the heat source radiates from above in the oven chamber to cook foods with a dry and intense heat. This high heat sears the outside, sealing the juices inside the meat. Foods that can be broiled should be tender, should have some fat content to preserve moisture and flavor, and should be an individual portion size. Keep the oven door completely shut while broiling. Remember that it is normal and necessary for some smoke to be present to give the food a smoky, barbecued flavor. The broil temperatures and rack positions may be adjusted.

FOODS THAT CAN BE BROILED:

- Meats such as beef, chicken, veal, lamb, and pork
- Sausages (puncture the skin to prevent bursting)
- Bacon (broiled flat or rolled)
- Seafood (both fish fillets and shellfish)
- Vegetables that are tender and have a high moisture content — such as onions, zucchini, squash, and peppers
- Garlic breads, toasts, etc.

Thin items should be cooked at high heat and as quickly as possible.

Medium-thick items should be started on high heat to sear the food, then finished in a cooler part of the broiler/oven cell by dropping the rack position down or by lowering the temperature of the broiler.

Thick items should also be started on high heat to sear the food, then finished in the oven at a lower temperature.

Times and temperatures for broiling may vary due to desired doneness of the food. Foods will often have to be flipped halfway through the broiling cycle.

TIPS FOR SUCCESSFUL BROILING:

1. Preheat the broiler 10 minutes. It will cycle on and off to maintain the temperature that you have selected. The element is on when a small red boxed icon says "On" on the control panel.
2. Bring foods to room temperature for about 15-20 minutes before broiling. Chilled foods will reduce the temperature under the broiler and not brown/ sear as well.
3. To keep meat from curling, slit fatty edges.
4. Trim the outer layer of fat from steaks and chops.
5. Cuts of meat that are too thin (smaller than $\frac{1}{4}$ ") may dry out too quickly, while foods that are too thick (2" or larger) may only sear from the outside and remain raw in the center. Please refer to the above section that addresses thin/thick foods.
6. For best results, thicker cuts of meat should be placed about 4" – 6" away from the broiler.
7. A 2-part broiler pan (provided with the unit) should always be used. This allows for fats to drip down into the pan below, reducing smoking and spattering. Using a sheet pan instead of the broiler pan may cause fats to be redirected into the heat, causing flare-ups.
8. Aluminum foil may be used to line the drip pan, but do not cover the cover the top slotted grill because it will keep fats from draining and may cause flare-ups, smoking, and spattering.
9. Use tongs to flip the meats halfway through the cooking process because a utensil that pierces the meat will allow juices to escape.
10. Meats can be brushed with oil or butter to maintain moisture and aid in the searing process.
11. To prevent sticking, lightly grease the broiler grill. Excess grease will result in heavy smoking.
12. Marinating meats, poultry and seafood is an excellent way to retain flavor in broiled foods.
13. Be sure to center the broiler pan directly under the broiler for maximum coverage. Center the pan lengthwise, then push it all the way to the back.

SINGLE RACK BAKING CHART

FOOD	PAN SIZE	MODE/RACK	CONV TEMP & TIME	STANDARD BAKE TIME & TEMP USE RACK POSITION 1 OR 2
ANGEL FOOD CAKE	10" tube pan	Pure Conv-3	350°F 40-45 min	Lowest rack position 350°F 45-50 min
BACON	Jelly roll pan or half sheet pan with rim	Pure Conv-3	375°F 20-25 min	400°F 30-35 min

APPETIZERS AND SIDE DISH RECIPES

OVEN BRAISED SHRIMP SCAMPI

This dish works well as an appetizer or can be mixed in with angel hair pasta for a meal.

*1/4 cup olive oil
1/4 cup butter
3 pounds large raw shrimp, peeled and deveined
2 Tbsp. minced garlic (about 4 cloves)
1 Tbsp. minced fresh ginger
1/2 cup Italian parsley, chopped
1/2 to 1 tsp. crushed red pepper flakes
1/2 cup dry white wine
1 Tbsp. lemon juice
Salt and cracked black pepper, to taste*

Preheat your oven to 375°F on Pure Convection™.

Put olive oil and butter in a large, ovenproof gratin dish and melt together in the preheated oven. Remove from oven and stir in shrimp, garlic, ginger, Italian parsley and crushed red pepper flakes. Stir to completely coat shrimp. Drizzle with white wine and lemon juice. Place in oven and cook until shrimp becomes pink and begins to curl, about 15-18 minutes. Stir halfway through the cooking process, if needed.

Serves 4.

OVEN-ROASTED TINY NEW POTATOES

*2 pounds Tiny New or Red Bliss Potatoes
1/4 cup olive oil
2 Tbsp. balsamic vinegar
1 Tbsp. fresh thyme
1 Tbsp. fresh Italian parsley
1 Tbsp. fresh basil
5 cloves garlic, minced
Salt and black pepper, to taste*

Preheat oven to 400°F on Pure Convection™.

After preheat, place an empty 9" x 13" x 2" baking dish in the oven for 10 minutes. When you add the potatoes, this will prevent them from sticking and will help them brown better. Cut potatoes into 1/2" to 1" quarters and place in a large bowl. In a small bowl, combine olive oil, balsamic vinegar, thyme, Italian parsley, basil, and garlic. Pour mixture over potatoes and toss potatoes to coat. Season with salt and pepper. Pour potatoes into preheated baking dish. Bake until potatoes are tender and browned, about 30-35 minutes. Stir the potatoes once or twice during baking.

Makes 4 servings.

SPINACH ARTICHOKE DIP

8 ounce box frozen chopped spinach or 2 cups fresh chopped spinach

1 (15 oz.) jar artichoke hearts

3 cups mayonnaise

1-2 Tbsp. garlic, minced

1 cup Parmesan cheese, shredded

Salt and pepper, to taste

Preheat oven to 350°F on Pure Convection™.

Drain and rinse chopped spinach. Drain and roughly chop artichoke hearts. In a large mixing bowl, combine spinach, artichokes, mayonnaise, garlic and Parmesan cheese. Season with salt and pepper. Add mixture to a baking dish. Bake for 15-20 minutes, or until sides bubble and top browns lightly.

Serve with toast points, warm tortilla chips or fresh chopped vegetables.

Makes 4 cups.

BAKED BRIE WITH CARAMELIZED ONIONS

1 sheet puff pastry dough, thawed

1 wheel of Brie cheese, about 4" in diameter

1 egg, lightly beaten

1 medium onion, small diced

1 Tbsp. butter

Salt and pepper, to taste

Preheat oven to 350°F on Pure Convection™.

Cut off top rind of Brie. Place Brie in the center of puff pastry dough. Fold the corners of the dough over the cheese, making sure it is completely covered. Brush puff pastry with egg. Bake until puff pastry has risen and is a light golden brown.

While the puff pastry is baking, prepare the caramelized onions. In a medium-sized sauté pan, melt butter. Add onions, stirring occasionally, until they reach a golden brown, about 10 minutes. Season with salt and pepper. Let the Brie sit for a few minutes, then slice the top off the puff pastry. Stir the caramelized onions into the soft cheese in the center. Serve with crackers or toast points.

Makes 1 (6") round.

SAGE STUFFING

If using earthenware, enamel-coated steel or other heavy ceramic bakeware, use Convection Bake. The heat will transfer better when using this mode.

12 slices day-old bread, cut into 1/2" cubes

1/2 cup unsalted butter

1 1/2 cups white onion, chopped

3/4 cup celery, small diced

1/4 cup carrot, small diced

1 large egg, lightly beaten

1 1/4 Tbsp. fresh sage, chopped

1 1/4 tsp. salt

1/2 tsp. ground black pepper

1/2 to 1 cup reserved drippings from turkey pan or chicken stock

Preheat oven to 325°F on Convection Bake.

Grease a 9" x 13" ceramic baking dish. Place bread cubes on baking sheet and dry in oven for 10 to 15 minutes. Transfer bread to a large mixing bowl and reserve. Melt butter in large sauté pan. Add onion, celery and carrot and cook for 5 minutes, until onions are translucent. Add to bread cubes and toss. Add egg and adjust seasonings with sage, salt and pepper. Add just enough pan drippings to moisten the bread. Pour mixture into baking dish and bake until top is brown and a toothpick inserted in the center comes out clean, about 30-35 minutes.

Additional seasonings may be added to the stuffing. Fresh herbs are preferred to dried because they add great color and flavor. Good ones to try are: Italian parsley, thyme, basil, oregano, tarragon, chives or green onion, chervil and rosemary.

Serves 4.

TERIYAKI SHRIMP KABOBS

TERIYAKI SAUCE:

*1 cup soy sauce
3 cloves garlic, mashed
2 Tbsp. fresh ginger, minced
2 Tbsp. sugar
2 stalks green onions, chopped
1 Tbsp. sesame seeds*

FOR KABOBS:

*1 pound large shrimp (31 to 40 count), peeled and deveined
1 package cherry tomatoes (about 20)
2 green bell peppers, cut into large pieces
1 large white onion, cut into large pieces
1 (16 oz.) can pineapple, cut into chunks
1 package long wooden skewers (about 20 are needed)*

Combine all teriyaki sauce ingredients and pour into a 1gallon, plastic Ziploc bag. Add shrimp, tomatoes, green bell peppers, onion and pineapple to marinate. Let marinate a minimum of 1 hour (maximum 4 hours) in the refrigerator.

Soak skewers in steeping hot water for 10 minutes. This will prevent them from burning and splintering.

Place oven rack on second highest position. Preheat oven to Broil on "HI". Lace skewers with shrimp and vegetables, alternating each. Place about half of them onto broiler pan or sheet pan with rim. Broil on "HI" for 3 minutes, turn skewers over to other side and continue to broil for another 3-4 minutes. Remove cooked skewers onto serving platter and repeat process with remaining skewers.

Serves 4.

GRILLED ASPARAGUS

This recipe uses Dacor's Grill accessory-AG11-13 for the RSD30 range. The intense cooktop heat gives the asparagus beautiful markings and a smoky flavor. Since the grill is one solid piece and has a high-temperature nonstick coating on it, clean up is easy! If you have an RSE30 or MRE30, you can find a flat-bottomed grill pan at any kitchen supply store.

2 bunches asparagus

3-4 cloves garlic, minced

1/4 cup olive oil

Juice of 1 lemon

Sea salt, to taste

Bring a large stockpot of water up to a boil. Meanwhile, break off the woodsy end of the asparagus- hold 2" below the floret end and snap in two pieces. Wherever it snaps is the woodsy end you want to remove. When the water is boiling, blanch the asparagus for 3-4 minutes. This allows the asparagus to retain a bright green color and it becomes more digestible. Drop in ice water for 1 minute. This step can be done one day in advance and refrigerated until use.

In a large Ziploc bag or large casserole dish, toss together asparagus, garlic, olive oil, and lemon juice. Let sit for a minimum 15 minutes- maximum 1 hour. Fix grill accessory onto cooktop and turn both burners to medium high. It is best to start with a high temperature to allow the grill to reach a good temperature (think smokin' hot!) and then adjust the temperature down as needed. With tongs, place asparagus onto grill. All the spears should fit- just line them up next to each other to cover the entire surface of the grill. Let sit for 3-4 minutes, then use the tongs to turn the spears to brown on all sides. Place on platter and serve immediately.

Serves 12.

SAUCES, SOUPS AND STEWS RECIPES

STAN JOSEPH'S VINHA D'ALHOS (PORTUGUESE MARINATED PORK)

This is a wonderful, flavorful recipe developed by Stan Joseph, Dacor's founder and 1st chef. It has been a traditional holiday recipe in his family for years, and we are happy to pass it on to you!

4 pound rolled, boneless pork roast

1 cup red or white wine vinegar

2 garlic cloves, mashed or minced

1 tsp. ground cumin

½ tsp. ground allspice

½ tsp. ground cinnamon

Pinch of ground cayenne pepper

1 Tbsp. salt

1 tsp. cracked black pepper

In a large casserole dish, mix all of the above ingredients and marinate the pork overnight in the refrigerator. Pierce the roast several times with a skewer and extend the marinating time an additional 12 hours. Preheat oven to 325°F on Standard Bake. Place one rack in position 1, counting up from the bottom. Place roast in a covered roasting pan and braise with marinade. Baste with marinade once or twice during cooking. The roast's internal temperature should be 160°F in the thickest, middle section for medium.

Serves 8.

Osso Buco is traditionally cooked with veal shanks, and is braised over a cooktop for hours and hours to develop the flavor. Since this stew is completely covered and then placed in the oven, I prefer to use Standard Bake on all oven types. By using this indirect heat, no scorching occurs on the bottom of the pan, allowing for the true flavor of this delicious stew to come out!

3½ - 4 pounds veal shanks or beef shanks (about 3)

Salt and pepper, to taste

1 cup all-purpose flour, for dusting

¼ cup olive oil

4 stalks celery, cut into large cubes

4 carrots, cut into large cubes

1 large onion, cut into large cubes

4-5 cloves garlic, minced

1 (6 oz.) can tomato paste

½ cup red wine

1 cup beef stock

Salt and pepper, to taste

Set oven rack on position 1, counting up from the bottom. Remove all other racks. Preheat oven to 350°F on Standard Bake.

Salt and pepper veal or beef shanks, then dust with flour. Set aside. In a large, ovenproof stockpot with a lid, heat oil. Add veal or beef shanks and brown them, about 4-5 minutes. Flip over and brown them on the other side. Remove to a plate and set aside. Do not drain oil from pan. Add celery, carrots, and onion. Cook until they are soft and onion is translucent, about 5 minutes. Add garlic and stir until fragrant. With a wooden spoon, stir in tomato paste and cook for a few minutes to get the raw tomato flavor out. Reduce heat to low and "deglaze" the pan with red wine. Continue to stir and let reduce slightly. Slowly add in beef stock to make a thick sauce. Add shanks back into sauce. Bring mixture to a boil. Place lid over the stockpot, and place entire stockpot in the oven. Let stew cook in the oven for 1½ hours. Cook until meat falls off the bone.

Serves 8.

BORDELAISE SAUCE

*1½ cups beef stock
¾ cup dry red wine
2 Tbsp. shallot, finely chopped
½ tsp. fresh thyme, crushed
1 bay leaf
3 Tbsp. unsalted butter, softened
2 Tbsp. all-purpose flour
1 Tbsp. chopped fresh parsley*

In a medium saucepan, melt 1 Tbsp. butter. Add shallot and cook until soft, about 2 minutes. Add the rest of the butter and flour. Stir to make a paste. Slowly add in red wine, let thicken. Add in beef stock and bring to a boil. Reduce heat and simmer for about 5 minutes. Add thyme and bay leaf. Simmer uncovered for 15 to 20 minutes. Remove bay leaf. Stir in parsley. On an RSD30 range, place on simmer plate on low until service. On an RSE30/ MRE30 range, turn burner to setting 1. Serve warm over beef.

Makes about 2 cups sauce.

CHILI CON CARNE

<i>2 pound ground beef</i>	<i>1 Tbsp. ground cumin</i>
<i>Salt and pepper, to taste</i>	<i>1 Tbsp. oregano</i>
<i>1 red serrano chili</i>	<i>8 ounce can tomato puree or tomato</i>
<i>1 green serrano chili</i>	<i>sauce</i>
<i>1 red bell pepper</i>	<i>½ bottle beer</i>
<i>1 green bell pepper</i>	<i>1 cup brown veal stock or beef broth</i>
<i>1 Anaheim chili</i>	<i>14 ½ ounce can pinto beans, drained</i>
<i>1 medium onion, chopped</i>	<i>14 ½ ounce can diced tomatoes</i>
<i>5 cloves garlic, chopped</i>	<i>1 Tbsp. tomato paste</i>
<i>2 Tbsp. ground cayenne pepper</i>	<i>Salt and pepper, to taste</i>

In an 8-quart stockpot, brown ground beef, drain fat and season with salt and pepper. Meanwhile, remove stems and seeds from serrano chilis, bell peppers, and Anaheim chilis. Finely chop. Add to ground beef along with onion and garlic. Cook until fragrant. Add cayenne, cumin, and oregano. Cook for a couple of minutes. Add tomato puree and cook. “Deglaze” with beer and let reduce slightly. Add veal or beef stock. Stir in beans and tomatoes. If chili needs to be thickened, add tomato paste. Transfer to a simmer plate and hold for up to 4 hours, if needed. If cooking on the RSE30, reduce heat setting to 1 and slightly push the pot off of the burner. Since the glass absorbs heat, this will help the burner come down in temperature faster. Season with salt and pepper.

Makes about 2 quarts.

QUICK BREADS AND YEAST BREADS RECIPES

MRS. GLEASON'S HOMEMADE YEAST ROLLS

*2 packages dry yeast
2 cups lukewarm water (between 105-110°F)
½ cup sugar
6½ - 7 cups all-purpose flour
1½ tsp. salt
1 egg, room temperature
¼ cup plus 2 Tbsp. unsalted butter, softened*

Combine dry yeast and lukewarm water in a large mixing bowl. Let sit for 10 minutes or until it becomes foamy, and yeast and sugar dissolve. Add 2 cups of flour and salt. Add ¼ cup butter and egg. Beat in remaining flour until smooth. Knead for 10 minutes on a floured surface. Put dough into a greased bowl and cover with a damp cloth. Place in a warm, draft-free environment to rise for about 1½ to 2 hours before baking. Shape into 2"- 3" balls for rolls. Place in two greased 9" x 13" x 2" pan, spacing them about 1" apart from each other. Brush rolls with 2 Tbsp. melted butter. Cover and let rest for 2 hours before baking.

Adjust oven racks to positions 2 and 4. Preheat oven to 375°F on Pure Convection™. Bake until golden brown, about 20 minutes.

Makes about 2 dozen rolls.

LEMON BLUEBERRY MUFFINS

Homemade muffins are very easy to make, and if you have access to fresh blueberries, it will make all the difference in this recipe.

*¾ cup fresh blueberries
1½ cups plus 2 Tbsp. all-purpose flour
2 tsp. baking powder
¼ cup plus 2 Tbsp. sugar
½ tsp. salt
1 cup milk
1 egg
⅓ cup butter, melted
1 tsp. almond extract
Zest of 1 lemon*

Preheat oven to 375°F on Pure Convection™.

Dredge blueberries in 2 Tbsp. flour to help prevent them from sinking to the bottom of the muffin. Set aside. Combine remaining flour, baking powder, sugar and salt in a mixing bowl.

In a separate bowl, beat together milk, egg, butter, almond extract, and lemon zest. Add to dry ingredients until moistened. Fold in blueberries.

Spoon batter into greased or paper-lined muffin tin. Bake for 15-20 minutes, or until muffins rise and turn golden brown. Let cool slightly and serve.

Makes 1 dozen.

BANANA BREAD

2 Tbsp. ground cinnamon

1/4 cup sugar

1 Tbsp. unsalted butter

6 ripe medium-sized bananas

1 cup butter

2 cups sugar

4 eggs

3 Tbsp. milk

1 tsp. vanilla

2 cups all-purpose flour

1 tsp. baking soda

1/2 tsp. baking powder

1/2 tsp. salt

1/2 cup chopped walnuts (optional)

Preheat oven to 325°F on Convection Bake.

In a small mixing bowl, combine cinnamon and sugar. Butter two 9"x5" loaf pans, then sprinkle half of the cinnamon sugar mixture inside each pan, shaking the pan to coat the sides. Save the remaining half for the top of the loaves.

In a large mixing bowl, add peeled bananas. Mash the bananas using a fork or a potato masher. Add butter and sugar, stirring to mix. Add eggs one at a time, mixing in each before adding the next. Add vanilla. In a medium-sized mixing bowl, combine flour, baking soda and salt. Add to banana mixture slowly and mix completely. Pour batter into prepared loaf pan. Sprinkle remaining cinnamon and sugar mixture on top of the batter. Bake until golden brown or until a toothpick inserted in the middle comes out clean, about 55-60 minutes.

Makes 2 loaves (about 10-12 slices each).

GARLIC BREAD

*1 cup butter, softened
5-6 cloves garlic, mashed
1 large shallots, minced
1/2 lemon peel, finely chopped
1/4 – 1/2 cup fresh Italian parsley
1 large loaves French bread, cut in half lengthwise*

In a large food processor combine butter, garlic, shallots, lemon peel and Italian parsley. Evenly spread butter mixture over French bread halves. Adjust rack to position 3, counting up from the bottom. Turn on broiler and broil bread until golden brown, about 1-2 minutes. Watch the bread carefully as it will burn quickly. Slice and serve warm.

Makes 1 cup compound butter.

Serves 6.

HAPA FRENCH TOAST

Use with Dacor's griddle accessory- Part number AG13 for the RSD30. For the RSE30 and MRE30 ranges, you can find a square griddle that is the same size as the large burner at any kitchen supply store.

King's Hawaiian bread, sliced 1/2" thick (makes about 8-10 slices), then cut in half crosswise to make 16-20 slices

5 eggs, beaten

2 cups sugar

1 cup milk

2 Tbsp. rum (or 2 tsp. vanilla extract)

2 cups macadamia nuts, finely ground

1 jar coconut syrup, or any other flavor works, too!

2 Tbsp. butter

Combine eggs, sugar, milk and rum in a large shallow dish. Put the ground macadamia nuts in another dish. Preheat griddle on medium high for about 7-8 minutes, then adjust down to medium. Dip Hawaiian bread in egg and sugar mixture on both sides, let drain slightly, then dip into macadamia nuts on both sides. Place on griddle immediately. Fry until nuts and bread begin to caramelize, about 3-4 minutes. Flip and repeat process on other side. Place syrup in a small saucepan, then on the simmer plate to keep warm.

The macadamia nuts can be ground in a food processor, but "pulse," do not blend. Macadamia nuts are very high in oil and will form a paste if processed for too long.

Serves 8-10.

HONEY WHEAT BREAD

This slightly sweet wheat bread turns out beautifully on Dacor's Convection Bake. It rises nicely and has a crispy crust on the bottom.

2 1/4 cups warm water (105-115°F)

1/2 cup honey

3 Tbsp. firmly packed brown sugar

2 packages dry yeast

1 cup instant nonfat dry milk

2 Tbsp. butter, melted and cooled

1 egg, lightly beaten

1 tsp. salt

2 cups bread flour

5 to 6 cups whole wheat flour

In a large mixer with dough hook attachment, combine warm water, honey, brown sugar and yeast. Mix lightly and let sit until bubbly, about 5 minutes. Stir in nonfat dry milk, butter and egg. Turn mixer on low. Add bread flour and salt. Scrape down the sides of the bowl with a rubber spatula. Add enough wheat flour to make a soft dough. Knead in the mixer for 7-8 minutes, or turn dough out onto a floured surface and knead by hand for 10 minutes. The dough should be smooth and elastic. Place in a greased bowl, lightly oil the top of the dough and cover. Let rise in a warm, draft-free environment for at least 1 hour or until doubled in size.

Preheat oven to 350°F on Convection Bake. Punch down dough and place on a floured surface. Divide dough in half. Roll half of the dough with a rolling pin into an 8" x 13" x 1" rectangle. Roll dough from the 8" side lengthwise, as if making a jellyroll, until a loaf forms. Press to release air bubbles and pinch edges to seal. Repeat with other half of dough. Place loaves seam side down in two greased 9" x 5" loaf pans. Bake on rack position 2 until loaves rise and brown, and bread sounds hollow when tapped on the bottom, about 30-35 minutes. Remove from loaf pan and cool on baking rack to prevent the bottom from becoming soggy. Let cool and slice.

Makes 2 loaves.

MAIN ENTREE RECIPES

PURE CONVECTION™ PRIME RIB ROAST

This roast cooks best on Pure Convection™ because it will cook faster and give the roast a beautiful sear. Be sure to raise the roast on a V-shaped rack so the convection air can circulate around the meat.

Approximate Prep time: 10 minutes

Approximate Cook time: About 24-25 minutes per pound

6 pound rib roast, boned and retied (this makes carving easier)

1/4 cup olive oil

1 Tbsp. coarse ground kosher salt

1 Tbsp. coarse ground black pepper

1/4 cup fresh rosemary, chopped; plus two whole sprigs

10 cloves garlic- 5 cloves minced, 5 cloves slivered

Preheat oven to 350°F on Pure Convection™. Place one rack in the number 2 position and remove all others.

Poke the slivered garlic into the roast. Make a rub out of the chopped garlic, olive oil, and rosemary. Rub on the roast to coat. Salt and pepper to taste.

Spray the roasting pan with nonstick cooking spray, and place two sprigs of fresh rosemary in the bottom of the pan. Place the roast on a rack tall enough so that most of the roast is above the sides of the roasting pan. The roast should be placed fat-side up.

Roast at 350°F for about 2 1/2 to 3 hours, or until internal temperature reaches 145°F for medium rare, 160°F for medium, or 170°F for well done. Remove from the oven and let rest for 15-20 minutes before carving. Cut and remove the butcher's string and lift the roast off the ribs to carve. Slice thinly against the grain and transfer to a serving platter. Serve warm.

Serves 12.

ROASTED LEMON ROSEMARY CHICKEN

4-5 pound roasting chicken

1 cup olive oil

1 lemon, halved lengthwise

1 tsp. garlic powder

1/4 - 1/2 cup fresh rosemary, chopped

Salt, to taste

1 cup Italian parsley, chopped

Pepper, to taste

Preheat oven to 350°F on Pure Convection™.

Clean and dry the chicken. Clean and cut the lemon in half and place inside the chicken cavity with several rosemary sprigs. Make a rub with Italian parsley, rosemary, and garlic powder. Season the outside of the chicken with the rub, salt, and pepper. Place on rack in roasting pan. Roast until golden brown and internal temperature reaches 180°F in the thigh. Cook time should be about 1 hour 30 minutes. Allow chicken to rest 5-10 minutes before carving.

Serves 4.

PURE CONVECTION™ ROASTED TURKEY

12-15 pound fresh turkey

3/4 cup olive oil

2 Tbsp. fresh rosemary, chopped, plus 2 whole sprigs

1 Tbsp. fresh thyme, chopped

2 Tbsp. fresh sage, chopped

1/2 cup fresh Italian parsley, chopped

Salt, as needed

Black pepper, as needed

1 white onion, peeled and quartered

Preheat oven to 350°F on Pure Convection™. Place one rack in the number 1 position and remove all others.

Remove neck and gizzards from the turkey, wash with cold water and dry with paper towels. Set aside.

Chop all fresh herbs, except for two whole sprigs rosemary, and mix into the olive oil. Rub the turkey inside the cavity and out with the olive oil mixture and salt and pepper to taste. Peel and quarter the onion and place in the turkey cavity.

Spray the roasting rack with a nonstick spray. Place the turkey on a rack tall enough so that most of the turkey is above the sides of the roasting pan. Place turkey in a preheated oven.

Cook the turkey at 350°F for approximately 10 minutes per pound or until the internal temperature reaches 180°F in the thigh. Remove and let rest for 14-15 minutes before carving.

This recipe can be doubled with an additional turkey without adding any cooking time.

Serves 12-15.

CURRY PORK TENDERLOIN

2 pork tenderloins, about 3/4 pound each

1/2 cup vegetable oil

2 Tbsp. Madras curry powder

1 tsp. ground black pepper

1 Tbsp. fresh gingerroot, minced

1 Tbsp. garlic, minced

Rub pork tenderloin lightly with vegetable oil. Make a rub out of curry powder, black pepper, ginger, and garlic. Rub tenderloins with spices. Place both on a flat roasting rack in a roasting pan. Cover and refrigerate for at least 1 hour.

Preheat oven to 350°F on Pure Convection™. Cook until internal temperature reaches 155°F. Cook time will be about 45-50 minutes. Let sit for 5-10 minutes before carving.

Serves 4.

* You may also use a 3-4 pound pork roast with this recipe. Marinate it the same way and cook it at the same temperature. Cook time will be closer to 2 hours for a roast of this size.

BUFFALO CHICKEN PIZZA

Use Dacor's ABS20 Baking stone with this recipe. Put the stone in the oven during preheat and allow an extra 20 minutes after the tone. Sprinkle the stone with cornmeal to prevent sticking. Your pizza crust will be crispy and brown on the bottom and your pizza toppings will be brown and bubbly on the top!

DOUGH:

1 1/4 cups warm water
1 Tbsp. active dry yeast
1/4 tsp. sugar
1 Tbsp. olive oil
3 cups all-purpose flour
1 tsp. salt

TOPPINGS:

2 boneless, skinless chicken breasts
1 Tbsp. oil
1/2 cup hot sauce
2 Tbsp. butter, melted
1/2 red onion, chopped
2 stalks celery, chopped
1 cup shredded jack cheese
1/2 cup prepared pizza sauce
2 Tbsp. cilantro, chopped
1 jar blue cheese dressing

FOR DOUGH:

Place water, yeast and sugar in a bowl. Let the mixture become bubbly and foamy, about 5 minutes. Add oil. Add flour one cup at a time. Add salt. Knead dough for 10 minutes to form a smooth ball. Place dough in a well-greased bowl, cover with plastic wrap and let rise until doubled, about 1 to 1 1/2 hours. Remove dough and shape into two 8" circles.

TOPPING AND BAKING

Preheat oven to 400°F on Convection Bake. Cut chicken into bite-sized pieces. Heat a sauté pan with oil. Add chicken and cook until no longer pink. In a small mixing bowl, stir hot sauce and melted butter together. Place chicken pieces into hot sauce mixture. Divide the pizza sauce between the two pizzas. Sprinkle the chicken, red onion, celery, and shredded jack cheese in that order onto each pizza. Place on a pizza stone or pizza pan in the oven on rack position 1 and cook until the crust is done underneath and the cheese is melted, about 20-25 minutes. Top with cilantro. Cut into 6 slices. Serve with blue cheese dressing on the side.

Makes two 8" pizzas.

HICKORY-SMOKE STEAKS

*4 New York steaks, about 1" thick (10-12 ounces each)
1 Tbsp. hickory-smoked salt seasoning
1/2 Tbsp. garlic powder
1/2 Tbsp. cracked black pepper*

Season the steaks liberally with hickory-smoked salt, garlic powder, and cracked black pepper. Place steaks on broiler pan. Make sure oven rack is in position 4, or 4 to 6 inches from the broiler to the surface of the steaks. Turn broiler onto 500°F. Place the broiler pan with steaks lengthwise under broiler, center and push it all the way to the back. Broil for 5-6 minutes to sear, remove pan from oven, flip the steaks over and broil for 4-5 minutes. Remove steaks and let sit for 5-10 minutes. Slice and serve.

Serves 4.

LEFTOVER GRILLED TURKEY PARMESAN SANDWICH

Use with Dacor's griddle accessory- Part number AG13 for the RSD30. For the RSE30 and MRE30 ranges, you can find a square griddle that is the same size as the large burner at any kitchen supply store.

<i>1/2 cup shredded Parmesan cheese</i>	<i>8 slices leftover turkey, sliced thin</i>
<i>1 tsp. garlic salt</i>	<i>4 slices Monterey Jack cheese</i>
<i>2 eggs</i>	<i>1 tomato, sliced thin</i>
<i>8 slices French or sourdough bread</i>	<i>1 avocado, peeled, seeded and sliced thin</i>
<i>4 Tbsp. butter</i>	

In a shallow dish, combine Parmesan cheese and garlic salt. In a separate shallow dish, lightly beat eggs. Heat Dacor griddle or small nonstick pan over medium heat. Add 1 Tbsp. butter. Dip only one side of the bread into the egg, then into the Parmesan and garlic mixture. Place onto griddle or pan, dipped-side down. Top bread with turkey, Monterey Jack cheese, tomato and avocado. Dip one side of second slice of bread into egg then Parmesan and garlic mixture. Place on top of sandwich, dipped-side up. Cook sandwich until browned and Monterey Jack cheese is melted, about 3-4 minutes, then flip and repeat on other side. Repeat process with remaining ingredients, adding more butter as needed. Slice in half and serve warm.

Makes 4 sandwiches.

SALMON FILLETS WITH LEMON DILL BEURRE BLANC

Beurre blanc is a wonderful butter-based sauce. It is very delicate and can "break" easily, meaning that the acids (lemon and wine) will separate out from the butter. Our simmer plate will hold this delicate sauce for 20 minutes without breaking.

LEMON DILL BEURRE BLANC:

*1 tsp. lemon juice
½ cup dry white wine
1 tsp. white wine vinegar
1 cup butter, cut into chunks
1 Tbsp. fresh dill, chopped
1 tsp. salt*

FOR SALMON:

4 Salmon fillets, about 1" thick, cut on the bias or "tranche" cut, about 5-6 ounces each

½ cup mayonnaise

Salt and white pepper, to taste

LEMON DILL BEURRE BLANC:

Place white wine and white wine vinegar in a small saucepan. Reduce down to 2 Tbsp. Over low heat, drop chunks of butter in, one by one, and "swirl" to incorporate. Drop the next piece in only as the other has fully melted. This will help the butter emulsify with the lemon juice and wine. Once all the butter is incorporated, add lemon juice and salt and place the saucepan on a simmer plate on low on an RSD30 range. On an RSE30, hold the sauce on setting 1. Stir in dill right before serving.

FOR SALMON:

Lightly brush each portion of salmon with mayonnaise to coat. This helps to seal in the moisture. Season with salt and white pepper to taste. Place on ungreased broiler pan. Adjust rack position to 4, counting up from the bottom. Turn on broiler to "Hi." Allow broiler to preheat for about 10 minutes, then place the salmon in the oven. Place the broiler pan in the oven so it is centered under the broiler, all the way to the back. Broil fish for 4 minutes, searing lightly. Flip and repeat on other side.

Pour lemon dill beurre blanc over salmon and serve immediately.

Serves 4.

CHICKEN MARSALA

4 skinless, boneless chicken breasts

1/4 cup all purpose flour

1/4 tsp. dried marjoram

1/8 tsp. salt

1/8 tsp. black pepper

1 cup fresh button mushrooms, sliced

2 Tbsp. green onions, minced

3 Tbsp. unsalted butter, divided

1/4 cup chicken broth

1/4 cup dry Marsala

2 Tbsp. fresh Italian parsley, chopped

Place each chicken breast between 2 pieces of plastic wrap. Pound lightly to 1/4 inch thickness. Remove plastic wrap. In a shallow bowl, stir together flour, marjoram, salt, and black pepper. Lightly press chicken pieces into flour mixture on both sides. Set aside.

In a large sauté over medium high heat (setting 7-8 on an RSE30/ MRE30 cooktop), cook mushrooms and green onions in 1 Tbsp. butter until tender. Remove from sauté pan. Cook chicken in remaining 2 Tbsp. butter in sauté pan until brown on both sides and no pink appears in the center- about 3-6 minutes a side. Add in mushrooms and green onions. Add broth and Marsala. Cook, uncovered, for 2 to 3 minutes or until mushroom mixture thickens slightly, stirring occasionally. Transfer to serving platter. Spoon mushroom mixture over chicken and garnish with Italian parsley.

Serves 4.

DESSERT RECIPES

CREAM CHEESE POUND CAKE USING TIMED DELAY FEATURE

This recipe, along with others that require foods to be cooked in a "cold start" oven or an oven that has not been preheated, works well on our Timed-Delay baking feature.

* Before using this feature, make sure that the clock has been set to the correct time and the correct A.M. or P.M. settings. This does not show on the clock display, but it is very important as to what time of day you would like the food completed.

Nonstick cooking spray

1/2 pound butter (2 sticks), softened

1/2 cup vegetable shortening

8 ounces cream cheese, softened

3 cups sugar

Dash of salt

6 eggs

3 cups cake flour

2 Tbsp. vanilla extract

Spray two 9"x 5" loaf pans with nonstick cooking spray. In a large mixing bowl, combine butter, vegetable shortening, cream cheese, sugar and salt. Mix together until well creamed. Add eggs 1 at a time mixing after each addition. Add flour 1 cup at a time. Add vanilla and combine. Divide batter into loaf pans. Place both loaves in cold oven on rack position 2.

TO SET TIMED DELAY:

- Press **Convection Bake** mode and the Down arrow until you reach 325°F.
- Press **Cook Time** button. This refers to the time you wish for the pound cake to be done cooking. Use the "Up" arrow to enter 55 minutes.
- Finally, press the **Stop Time** button. This refers to the time you wish for the pound cake to be done baking. Use the Up arrow to select the time of day you wish to have the dessert.
- If you wish to start the pound cake now, don't enter a new time into the **Stop Time**, just press **Stop Time** once. You must not skip this step, or the oven will go through its normal preheat with the broiler. Notice that the 55 minutes has been added into the **Stop Time** for you.
- When the pound cake is done, 3 beeps will sound. Remove the cake, let cool, and enjoy your perfectly cooked pound cake.
- If you are not around to hear the beep, the oven will go into a "**Hold**" mode. It will display **Hold** on the screen and maintain 150°F. The oven is going into a **Hold** mode at 150°F so that the food will not be in the temperature danger zone (40°F-140°F). Keep in mind that the pound cake will continue to cook in the Hold mode due to the residual heat in the oven, but it will be safe to serve to your guests. It will remain in this mode for 2 hours.

Makes two 9"x 5" loaves.

ANGEL FOOD CAKE

1½ cups egg whites (10-12 large eggs)

1½ cups sifted powdered sugar

1 cup sifted cake flour

1½ tsp. cream of tartar

1 cup granulated sugar

1 tsp. almond extract

Preheat oven to 350°F on Pure Convection™.

Let egg whites come to room temperature. Sift powdered sugar and cake flour together. Add cream of tartar to egg whites. Beat with electric mixer until soft peaks form. Gradually add granulated sugar, beating until stiff peaks form. Add almond extract. Fold dry mixture into whites ¼ at a time. Stir with a whisk to incorporate fully. Pour into ungreased 10" tube pan. Using a rubber spatula, cut through batter to get rid of air pockets. Bake until risen and browned, about 40-45 minutes. Top should spring back and should not be sticky in the folds. Immediately invert on rack, leave in pan. Cool thoroughly. Loosen sides and remove cake. Let cool and slice to serve.

Makes one 10" cake (about 12 slices).

LEMON LOVER'S COOKIES

1 cup butter flavored vegetable shortening

1½ cups sugar

1 Tbsp. water

1½ tsp. lemon extract

2 Tbsp. lemon juice

2 eggs

1 tsp. finely grated lemon peel

¾ cup flaked coconut

2½ cups all purpose flour

1½ tsp. cream of tartar

1 tsp. baking soda

¼ tsp. salt

1 Tbsp. poppy seeds

Preheat oven to 325°F on Pure Convection™.

Mix coconut with lemon juice in a small bowl and let sit for 10 minutes. Cream together vegetable shortening and sugar until fluffy. In a bowl, mix water, lemon extract, lemon juice with coconut, eggs and lemon peel. Add to shortening mixture. Sift together flour, cream of tartar, baking soda, salt and poppy seeds in a separate bowl, then combine all ingredients and beat together. Drop by rounded teaspoonfuls, about 2 inches apart on lightly greased cookie sheet. Bake until lightly browned around edges, about 12 minutes.

Makes about 2 dozen cookies.

SALLY'S OATMEAL COOKIES

<i>1 cup vegetable shortening</i>	<i>1/4 tsp. ground allspice</i>
<i>3/4 cup brown sugar</i>	<i>3 cups rolled oats</i>
<i>3/4 cup granulated sugar</i>	<i>1/2 cup raisins</i>
<i>1 1/4 cups flour</i>	<i>1/2 tsp. vanilla extract</i>
<i>1 tsp. baking soda</i>	<i>2 eggs</i>
<i>1/2 tsp. salt</i>	<i>1/2 cup chopped walnuts, chopped</i>
<i>1/2 tsp. ground cinnamon</i>	

Preheat oven to 325°F on Pure Convection™.

In a mixer, cream together vegetable shortening, brown sugar and granulated sugar. Add vanilla extract and eggs and beat on low speed. In a small bowl, sift together flour, baking soda, salt, cinnamon and allspice. Gradually add to the mixer. Mix until combined. Stir in rolled oats, raisins and walnuts. Drop by rounded tablespoonfuls on two lightly greased cookie sheets. Bake until light golden in color, about 11-13 minutes.

Makes about 2 dozen.

CREAMY PUMPKIN PIE

PIE DOUGH:

*1 cup all- purpose flour
½ cup unsalted butter, cut into cubes
¼ cup ice cold water*

FILLING:

*1 (16 ounce) can pumpkin pie filling
1 (14 ounce) can sweetened condensed milk
2 eggs, beaten
2 tsp. pumpkin pie spice or 1 tsp. cinnamon,
½ tsp. ginger, ½ tsp. nutmeg
½ tsp. salt*

TOPPING:

*1½ cups sour cream
2 Tbsp. sugar
1 tsp. vanilla
2 cups pecan halves, to decorate*

For the pie crust, combine flour and salt in a mixing bowl. Cut in cubes of butter to form small pieces, about the size of a pea. Drizzle in water. Add just enough until the dough forms a ball. Wrap in plastic and refrigerate for 30 minutes. Roll dough out on a floured surface to fit a 9" round pie dish.

Preheat oven to 400°F on Convection Bake. In a large bowl, combine pumpkin pie filling ingredients until well blended. Pour filling in piecrust. Bake for 10 minutes, then reduce temperature to 350°F. Bake for an additional 20-25 minutes, or until pie does not jiggle when shaken lightly.

Remove pie from oven and add sour cream topping on top of the pumpkin pie filling. For the sour cream topping, combine sour cream, sugar, and vanilla. Spread on top of pie. Decorate top with pecan halves. Bake for an additional 10 minutes, or until sour cream topping is set.

Serves 8.

TOASTED COCONUT CRÈME BRULEE

6 (4-ounce) broil proof ceramic dishes

2 cups heavy cream

2 cups sweetened flake coconut

5 egg yolks

1/3 cup sugar

1/8 tsp. salt

1/2 vanilla bean

1/2 cup superfine sugar* or brown sugar

Preheat oven to 325°F on Standard Bake. Place coconut flakes on a cookie sheet. Toast for about 10 minutes, or until golden brown. Remove coconut from the oven carefully because the oils can burn your eyes.

In a heavy saucepan, heat the heavy cream. Slice down the center of the vanilla bean and add it to the cream. Add the toasted coconut. Remove from heat and set aside, letting the toasted coconut steep in the cream.

In a large mixing bowl, combine egg yolks, 1/3 cup sugar, vanilla extract and salt. Beat with a whisk until just combined. Strain coconut and vanilla bean out of cream into a bowl, then slowly whisk cream into egg mixture. Don't too quickly at the beginning, because it will cause the yolks to curdle.

Place six 4-ounce broiler-proof custard cups in a 3-quart rectangular baking pan. Pour egg custard mixture evenly into cups and carefully transfer to preheated oven. Using a measuring pitcher, pour enough hot water into the baking pan around the custard cups to reach halfway up the sides of the dishes. This will act as a buffer to slowly cook the custard without browning. You want the crème brûlée to be set but not browned. Bake until only about a dime-sized piece in the center of the custard still shakes, about 30-40 minutes. Remove from the water bath and cool on an oven rack. Cover and chill for at least 1 hour up to overnight.

Before serving, let custard stand at room temperature for 20 minutes. This will help prevent the cups from cracking during the "brûlée." Sprinkle an even layer of superfine sugar or brown sugar over the surface of the custard, using an index finger to fill it in. Set oven to Standard broil on "HI" and set the oven rack on position 4 (counting up from the bottom). Place custard cups with sugar on them close together on a small cookie sheet. Place pan in the center of the rack under the broiler all the way to the back, and broil for 4-5 minutes, or until the top browns and creates a hard shell over the custard. Serve immediately.

*The make your own superfine sugar, grind granulated sugar in a food processor.

Serves 6.

COMMON BAKING PROBLEMS AND SOLUTIONS

PROBLEM	REASON	SOLUTION
COOKIES AND BISCUITS BURNT ON THE BOTTOM	Oven door opened too often Dark, absorbent pan was used Incorrect rack position being used and pan is too close to the heat source Standard Bake or Convection Bake mode is being used Pan is too large and too close to element	Set minute timer to shortest recommended time and look through window to check doneness Use shiny, reflective pans with low sides Check cookies by looking through the oven door window instead of opening door Use recommended rack position and use Pure Convection Use smaller pan
COOKIES AND BISCUITS ARE TOO BROWN ON TOP	Rack position being used is too high Oven not fully preheated The pan's sides are too high	Use the rack positions recommended in this guide Allow oven to preheat fully before placing food in the oven Use recommended pan size
CAKE SIDES ARE BURNT AND CAKES ARE NOT DONE IN THE CENTER/ CAKES BURST ON TOP	Oven too hot	Reduce temperature
POOR VOLUME FOR CAKES AND BAKED GOODS	Too little flour Too much liquid Oven too hot.	Measure ingredients carefully Lower oven temperature
UNEVEN CAKE SHAPE	Batter spread unevenly Oven rack not level	Shake pan lightly to even out batter Make sure oven rack is properly in place Place cakes in center of oven
CAKE TEXTURE IS TOUGH OR CRUMBLY	Too much flour Too little sugar or shortening Batter overmixed	Decrease flour Increase sugar or fat Do not overmix batter- use recommended mix times
COOKIES ARE TOO CRISP	Low moisture in product High sugar and fat content Thin shape Baked too long	Increase liquid Decrease sugar or fat Cut/roll larger pieces Decrease baking time
COOKIES ARE TOO SOFT	Too much liquid Low sugar or fat Underbaked Large/ thick shape	Decrease liquid Increase sugar or fat Increase cooking time Cut slightly smaller

COMMON BAKING PROBLEMS AND SOLUTIONS

PROBLEM	REASON	SOLUTION
COOKIES ARE TOO CHEWY	Too much egg High sugar and liquid, but low fat content Overmixed	Decrease egg content Increase fat content Do not overmix when adding flour
PIE DOUGH IS TOO TOUGH	Overmixing dough	Use minimal mixing times when adding water
PIE DOUGH IS CRUMBLY	Not enough water; too much shortening	Increase water; decrease fat
PIE DOUGH SOGGY OR RAW ON BOTTOM	Oven temperature too low; not enough bottom heat	Increase temperature Use Convection Bake or Standard Bake Use lower rack position
PIE DOUGH SHRINKS	Dough overworked Too much water	Use minimal mixing times Decrease water
PIE FILLING BOILS OUT	No steam vents cut across the top Oven temperature too low Filling hot when put in shell Crust not sealed; too much filling	Cut steam vents in top crust Increase oven temperature and use Convection Bake and Standard Bake Allow filling to cool before adding to pie shell Seal crust; don't overfill the pie crust
CURDLING OF CUSTARD OR SOFT FILLINGS	Overbaked	Decrease baking times
YEAST BREAD SPLIT OR BURST CRUST	Overmixing dough Oven too hot	Use minimal mixing times- just until dough is elastic Decrease oven temperature
BLISTERS ON BREAD CRUST	Too much liquid Improper fermentation	Decrease liquid Make sure loaves ferment at correct time and temperature
BREAD TOO DENSE OR CLOSE-GRAINED	Too much salt Too little liquid Too little yeast Underproofed	Decrease salt Increase liquid Increase yeast Increase proofing time
BREAD CRUST TOO DARK	Oven too hot	Decrease oven temperature Allow oven to preheat fully
BREAD CRUST TOO LIGHT	Too low temperature	Increase temperature Use lower rack position Use Standard Bake or Convection Bake

WEIGHTS AND MEASURES

3 teaspoons = 1 Tablespoon	1 Tablespoon = $\frac{1}{2}$ fluid ounce
4 Tablespoons = $\frac{1}{4}$ cup	1 cup = 8 fluid ounces
5 $\frac{1}{3}$ Tablespoons = $\frac{1}{3}$ cup	1 cup = $\frac{1}{2}$ pint
8 Tablespoons = $\frac{1}{2}$ cup	2 cups = 1 pint
1 pint = 16 fluid ounces	1 quart = 32 fluid ounces
$\frac{1}{2}$ gallon = 64 fluid ounces	1 gallon = 128 fluid ounces
10 $\frac{2}{3}$ Tablespoons = $\frac{2}{3}$ cup	4 cups = 1 quart
12 Tablespoons = $\frac{3}{4}$ cup	2 pints = 1 quart
16 Tablespoons = 1 cup	4 quarts = 1 gallon

MINIMUM SAFE INTERNAL TEMPERATURES FOR VARIOUS FOODS

GROUND MEATS AND MEAT MIXTURES	°F
Beef, Pork, Veal, Lamb	160
Turkey, Chicken	165
Fresh Beef, Veal, Lamb	
Medium Rare	145
Medium	160
Well Done	170
Poultry	
Chicken and Turkey, Whole	180
Poultry Breasts, Roast	170
Poultry Thighs, Wings	180
Duck and Goose	180
Pork	
Medium	160
Well Done	170
Ham	
Fresh (raw)	160
Pre-cooked (to reheat)	140

Please note that the minimum safe internal temperatures are subject to change. This is due to the changing bacteria and the temperatures required to eradicate them. Visit the below website for the most current information.

*These cooking temperatures are from the USDA Meat and Poultry Hotline
(800) 535-4555 or www.fsis.usda.gov*

A WORD ABOUT CARRY-OVER COOKING

After foods are pulled out of the oven, they will continue to cook. Carry-over cooking affects all foods; the larger the item, the longer the carry-over time. It is best to let the food rest for 10 to 15 minutes after it comes out of the oven. This will allow meat to retain its juices and baked goods to continue to set, making it easier to cut and cook to a safe temperature to serve.
